Projects

Identity and Behavior on Social Media Platforms

Clemson, SC

SCHOOL OF COMPUTING, CLEMSON UNIVERSITY

2016 - PRESENT

- Social Media Platforms (e.g. Quora, Yahoo! Answers etc, Zhihu, Reddit) are playing an increasingly important role in information seeking and sharing. Askers and answerers use different identities to participate on Social Media Platforms. They use their real names, pseudonyms or anonymity to post information. I explore the relationship between identity and user engagement, content quality and trolling behavior. Also explored the relationship between anonymity and content moderation.

CrowdSec

Clemson, SC

SCHOOL OF COMPUTING, CLEMSON UNIVERSITY

2017 - PRESENT

- Finding new ways to make authentication more secure and reliable is crucial. I explore video-based social authentication using the users' existing social network. I provide insights into contextual factors that may affect the use of video chat as a fallback authentication method in a small social network(e.g., family members and close friends).

mHealth

Clemson, SC

SCHOOL OF COMPUTING, CLEMSON UNIVERSITY

2014 - 2015

- Patients want granular privacy control over health information in electronic medical records(EMR). Designed a mobile application to assess patients' desire for granular level privacy control over which personal health information should be shared, with whom, and for what purpose; and whether these preferences vary based on sensitivity of health information.

ChronicWeb

Pittsburgh, PA

HUMAN-COMPUTER INTERACTION INSTITUTE, CARNEGIE MELLON UNIVERSITY

2013 - 2014

- Explored the impact of individual differences on trust in the context of information seeking behavior. Developed two scales to measure trust in websites and trust in forums.
